REPORT OF BOARD OF EDUCATION.

To the Inhabitants of the Town of Sunapee :

The Board of Education respectfully submit the following report of the public schools of Sunapee for the year ending March 1, 1889 :

The schools, on the whole, have had a very successful year, but still, in exceptional instances, they have not been all that could be desired. In order to be successful, a teacher must be thoroughly interested in teaching in general, and particularly interested in the school of which she has charge, and should have no outside employments or amusements which will in any way divert the mind from the school and the highest interests of the scholars. The more we see of teachers and their work, the more fully we believe that a teacher, to meet with the most success, should be well educated—should know far more than just enough to help the scholars through their books. There are many things not in common school-books which an intelligent, practical teacher can instil into the minds of pupils between the regular recitations, or when scholars are tired of study and restless from lack of interest.

As far as has been practicable, we have employed home talent for teachers. We believe this the better way, because it keeps not only our own money but our own people at home. We are ready to welcome good teachers, wherever they come from, but especially ready to welcome our own.

We have endeavored to give, as far as practicable, every scholar in town the same advantages for education. We have had some school in every school-house in town, but in some there have not been as many weeks as in others, but to compensate the scholars who would have gone to school in these houses, we have given them a chance to attend other schools,

so that they might get as many, if not more, than the average number of weeks. If scholars have not availed themselves of these chances, it is their own loss. There are two schools which have only five or six scholars, and it seems a waste of money to run a school in each of these, when they might combine with other schools and get more benefit if they would travel a little for it.

The graduating exercises of the first class to graduate from our grammar school occurred June 26, 1888, were well attended, and passed off smoothly and successfully. The class numbered eight,—six ladies and two gentlemen. We hope many more such classes will follow.

We find in looking over the registers that there are many—far too many—tardy and absent marks. This can and should be remedied. Both parents and scholars are to be blamed for this. The majority of the marks for tardiness do not occur in localities where scholars are obliged to walk a mile or more, but we find the marks opposite the names of those who live almost within hearing distance of the teacher's bell. If a thing is worth doing at all, it is worth doing well and right. If scholars want to get the most good possible from their school-days, then get all there is in each day.

But there is another point to be considered in relation to tardiness. It is not the tardy scholar alone who is injured, but the whole school is disturbed and confused by the entrance of tardy ones. If parents will give their attention to this, they can overcome it in a measure, and help the teacher secure a good school. Before any one complains of the poor quality of a school, let him see to it that his own scholar is not doing anything to make the quality poorer.

E. R. BOYCE,
E. C. FISHER,
GEO. H. BARTLETT,
Board of Education.
